SKILLS

Languages (TypeScript, JavaScript, Python) • **Backend** (Node.js, NestJS, REST APIs, Microservices, Event-driven architecture) • **Frontend** (Angular, RxJS) • **AWS** (ECS, Serverless, RDS, CloudWatch) • **Databases & Search** (MySQL, OpenSearch) • **Observability** (Datadog, FullStory) • **Practices** (Clean Code, Unit Testing, Agile)

EDUCATION

BS Computer Science 2019 – 2023
PUCIT (3.20 CGPA, Teaching Assistant: Intro to DataScience, WebScraping)

PROFESSIONAL EXPERIENCE

Rewaa

Software Engineer II 09/2025 – Present
Remote, Saudi Arab

- Worked on **OpenSearch** index design, migrations, and zero-downtime reindexing strategies.
- Conducted rigorous **code reviews**, ensuring high-quality standards, achieving **100%** unit and integration test coverage.
- Maintained **Zatca** e-invoicing compliance operations, resolving integration errors.
- Led company-wide **Learning Lab** sessions, fostering knowledge sharing and upskilling engineers on key technical topics.

Software Engineer I 06/2023 – 08/2025
Remote, Saudi Arab

- Designed the **Point-of-Sale development**, supporting **25K+ customers** and achieving **17M+** invoices a month.
- Optimised multiple APIs**, improving performance by **up to 3x** through query optimisation and other strategies.
- Designed data-driven reports using **Cube.js**, leveraging optimised MySQL queries for efficient data processing, resulting in a **50%** reduction in infrastructure costs.
- Participated in re-architecting a **serverless** system into a **microservice-based** architecture with **NestJS**, deployed on **AWS ECS**, resulting into reduced churn rate due to achieving high performance and quality.
- Refactored **80%** of legacy code in **Angular** and **RxJS**, improving maintainability and performance of the frontend.

Numpy Labs 09/2022 – 12/2022
Software Engineer Lahore, Pakistan

- Worked for a US-based healthcare client to create RestFul APIs in aws/chalice.
- Did data oriented courses from datacamp.

Foretheta 06/2022 – 08/2022
Full Stack Intern Remote, USA

Shipped my first ever production code on the product **Billgist**(React/AWS/chalice), which manages the costs of AWS users.

PROJECTS

Chatbot 
FYP

This open-domain chatbot was developed as an R&D final year AI university project. It utilizes deep learning models for natural language understanding and is deployed using Flask.py and Heroku.

Decouple Nest.js code 

Developed a scalable, decoupled communication layer using **NestJS** and **EventEmitter** to replace tightly coupled module interactions; improved code maintainability and shared insights through a **Medium article**.
